

1       **THE CLAIMS**

2  
3       **1-19. (canceled)**

4  
5       **20. (previously presented):** A portable handheld computing device  
6 comprising:

7       a casing having a base and a lid that opens and closes relative to the base,  
8 the lid having an upper surface, opposing side surfaces, and opposing end  
9 surfaces; and

10       a light emitting device mounted externally on the casing, the light emitting  
11 device being activated upon occurrence of an event to notify a user, positioned on  
12 the upper surface of the lid, and wrapping around to one of the end surfaces so that  
13 the light emitting device is visible from both opposing side surfaces and both  
14 opposing end surfaces when the lid is opened or closed.
